Ships under Repair

1. ADMIRAL NAKHIMOV: This vessel is to be re-equipped with new boilers, as it was recently discovered that the old boilers were completely rotted. It is not known from where the new boilers will come.
2. SOVETSKI SOYUZ: The turbines of this vessel are still undergoing repair at the Bergmann-Borsig Works.
3. YURI DOLGORUKI: No comment.
4. Ice breaker CASTOR: This former German ice-breaker, recently salvaged off Warnemuende, is at present lying alongside Warnemuende in Russian hands. It has not yet been decided to which yard she should go for repair. The Neptun Werft Rostock was to have accepted the contract but the ships draft is too great to allow easy passage down the Warnow.

New Construction

5. Work continues on the construction of a floating dock of 6,000 tons lifting capacity and 106 m length. The dock is to be built in six sections and will be powered by four Buckau-Wolf diesels. The dock was designed by the special bureau in the Peenewerft, Wolgast, headed by Ing. Schlaak, and its construction is being carried out in accordance with an East German government contract.
6. Preparatory work for the construction of Volga craft is under way.
